

Muscat on 12th December 2023

Press Release

Oman Petro Environmental Services Company (OP) has successfully obtained the ISO 22320:2018 Emergency Management certification. This standard can be applied by any organization, but the certification is particularly relevant to those organizations involved in preparing for or responding to incidents at the international, national, regional, or local level. It encompasses top international practices for handling emergencies efficiently.

By adhering to this global standard, organizations like OP enhance their ability to manage diverse emergency situations, ranging from minor incidents and crises to major disruptions and disasters. They are equipped to provide accurate and trustworthy information, reduce miscommunications, and manage resources for emergency response more effectively, both individually and collaboratively.

OP stands out as the first oil and hazardous materials (hazmat) response service provider based in the Middle East to achieve the ISO 22320:2018 Emergency Management certification. This accomplishment sets a precedent in the region, highlighting OP's commitment to excellence in emergency response and management in the oil and hazmat sectors. Their certification underlines their role as a leader in adopting international standards for emergency preparedness and response, particularly in challenging and high-risk industries.

About OP

OP is a 100% Omani-owned SME. The company specializes in oil spill response and environmental consultancy services, boasting a management team comprising both national and international experts, as well as the largest team of in-country response personnel, with the highest Omanisation percentage in its field in Oman. Our client base encompasses government agencies, government-owned, and private sector companies operating in the energy, logistics, and industrial sectors. OP has rapidly established itself as a renowned provider of cost-effective emergency response and environmental protection solutions. Having already delivered successful projects in the UAE and Qatar, the company is currently expanding its operations within the GCC region.
